WATERQUEST SOLUTIONS

P1 Janus water pump

Equipment selection record

Compact axial-piston pump with nominal 0.8 and 1.2 cm³/rev options. At 1,500 rpm, theoretical flow is 1.2 and 1.8 L/min (0.317 and 0.476 US gpm). Delivered flow is established from the duty-point curve.

The pressure rating, speed and temperature envelope must be issued for the selected P1 configuration with the quotation. The following reference curves and dimensions are not an approval to operate at a different duty.

Installation and quotation

Specify fluid chemistry, temperature, filtration, inlet supply, backpressure, speed, rotation, shaft coupling and mounting. No induced radial or axial shaft load. Include the required controls, commissioning and documentation.

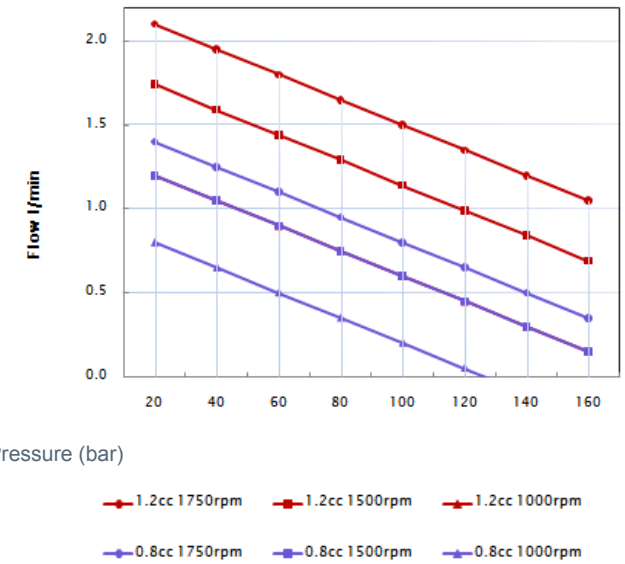

Source: The Water Hydraulics Company, Janus pump catalogue V.01.25 and model information. Reference curves and dimensions follow.

Manufacturer: The Water Hydraulics Company, UK.
Canadian distributor: WaterQuest Solutions.

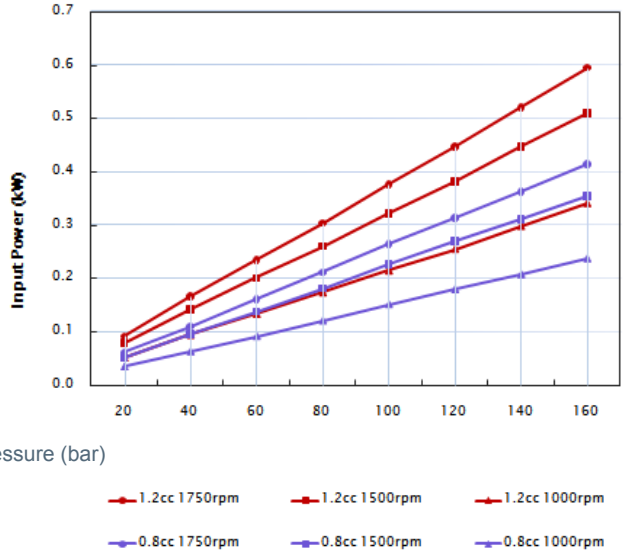

P1 | Performance curves

Read displacement, speed and pressure together. Published curve data are preserved.

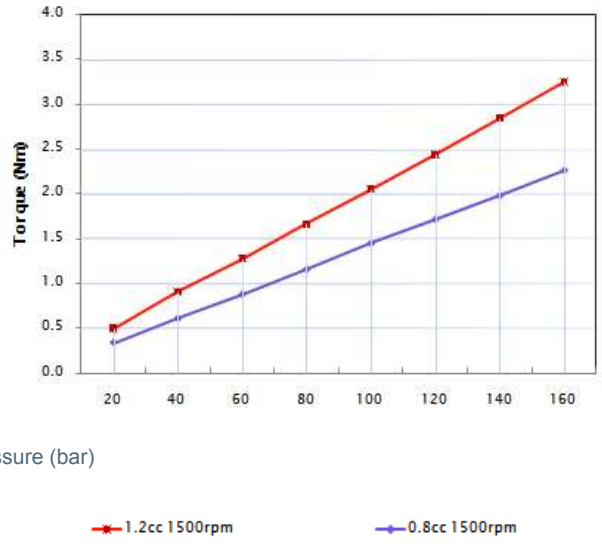

Output flow (L/min)

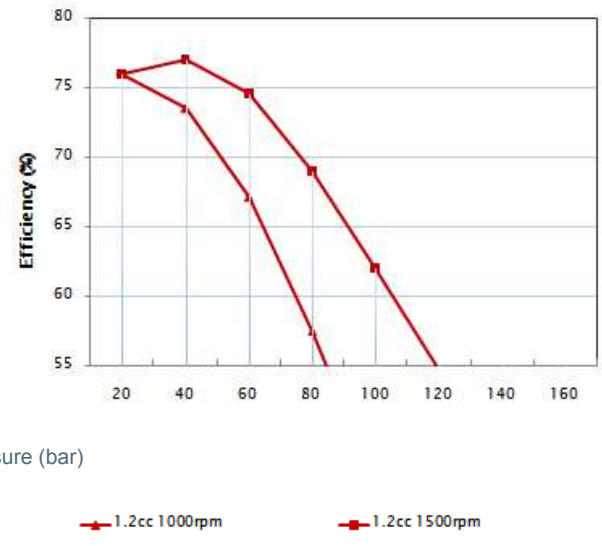

Input power (kW)

Input torque (N·m)

Overall efficiency (%)

Apply the curves to the duty

P1 pressure varies by configuration: the range table lists 160 bar, while the dimensional page shows PC100 models. The standard HPU uses a 100 bar limit. Use the ordered rating. The 90 °C range-table maximum requires configuration review; standard guidance above 50 °C is conditional.

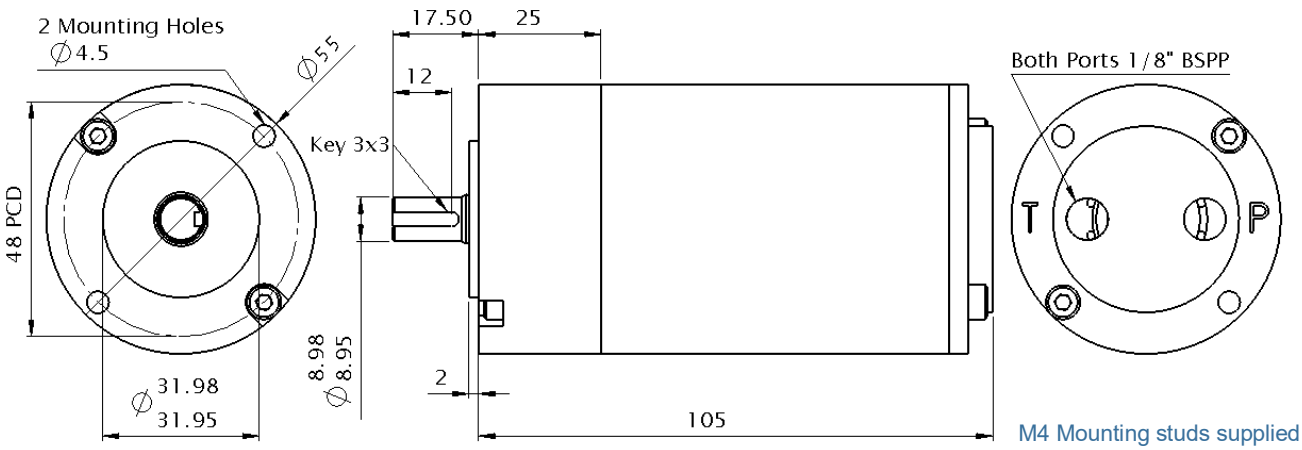

1 L/min = 0.264172 US gpm; 1 bar = 14.5038 psi; 1 kW = 1.34102 hp; 1 N·m = 0.737562 lbf·ft.

P1 | Dimensions & connections

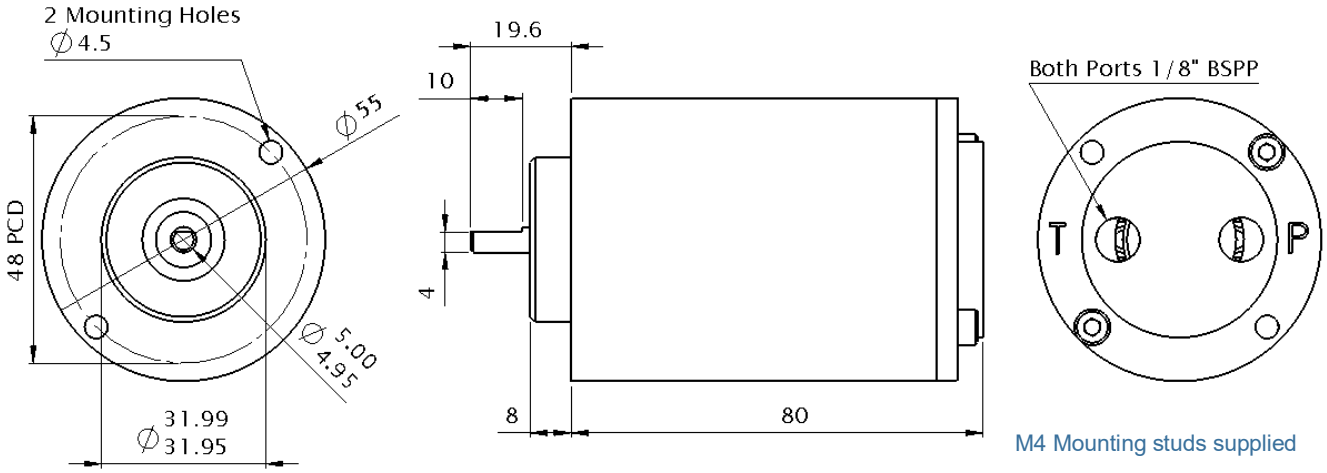

Manufacturer technical reference | dimensions govern; reproduction is not to scale.

PC100-0.8WMS & PC100-1.2WMS

M4 Mounting studs supplied

PC100-0.8W & PC100-1.2W

M4 Mounting studs supplied

Port threads and flange classes are connection designations, not converted diameters or operating-pressure ratings. Select the exact configuration shown on the approved order drawing.
