WATERQUEST SYSTEMS & COMPONENTS

# Make water power your advantage.

Move equipment. Control the process. Reduce hydraulic-oil exposure.

## Pumps & motors

Supply pressure and flow, then turn it into productive rotary motion.

Pumps P1-P180 | Motors M3-M180

## Water hydraulic cylinders

Push, pull, lift and position with stainless actuators matched to your load.

11 configurations | Seven bore sizes | Mounting and rod-end options

## Hydraulic power units

Bring the pump, reservoir, filtration and controls together around your duty.

Pick a Pack | P1/P3/P6/P15; larger pumps on request

## Valves & control packages

Manage direction, speed and pressure with water-service valves and controls.

Directional | Load holding | Flow and pressure control | Manifolds

## Tell us what needs to move, turn or hold.

Send a duty, drawing or part number for product selection and a quotation.

Images show representative configurations. Water hydraulic ratings and materials are matched to the application.

SPECIALIST EQUIPMENT & APPLICATIONS

# Systems for demanding water duties.

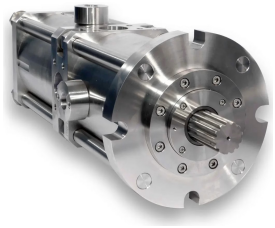

Bring a defined operating need. Build a focused equipment package.

## Duplex seawater pumps

Dedicated Duplex 2205 configurations for saline-service pumping.

P6-P600 | Up to 80 bar (1,160 psi)

## RO Power Centres

Recover useful brine pressure to assist the feed-pump drive.

PC250, PC300, PC500 and PC1000

## Fire-pump components

Match pump flow and pressure to the approved protection design.

P1, P3, P6, P15, P60 and P180

## Halo odour control

Pair plant-based treatment with targeted atomising delivery.

Wastewater, waste/organics and suitable industrial releases

## Start with the water duty or site challenge.

Request product selection, a component package or a project-specific proposal.

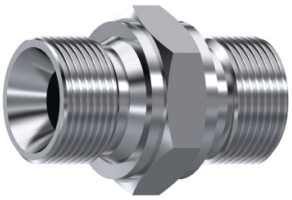

bruce@waterquestsolutions.com | +1 (604) 902-1902

Representative images. System approvals and application performance are defined with the proposal.

WQS STAINLESS FITTINGS & ADAPTERS

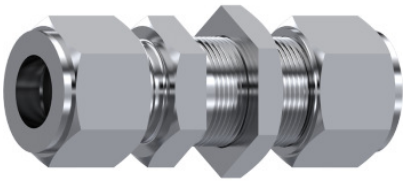

# Complete the circuit with stainless.

Connection hardware, controls and instruments in one coordinated enquiry.

## Adapters

BSPP/BSPT, NPT, JIC, ORFS and O-ring boss. Straight, elbow, tee and reducer forms.

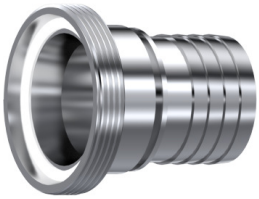

## Twin-ferrule fittings

TrAle LOK tube connections, threaded transitions, bulkheads, nuts and ferrules.

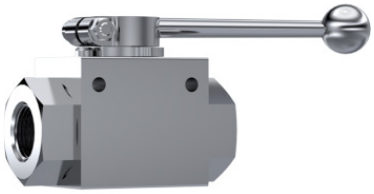

## Pipe & welding fittings

Pipe, DIN tube fittings, weld ends, flanges, clamps and installation hardware.

## Hose & industrial fittings

DIN 11851, SMS, Macon, clamp unions and PTFE hose connection families.

## Control components

Flow, check, relief and ball valves for compatible fluid-system duties.

## Instruments & accessories

Pressure gauges, test points, micro-hose fittings, quick couplings and swivels.

## Send your fitting list or bill of materials.

Include connection standards, sizes, materials, quantities and target delivery date.

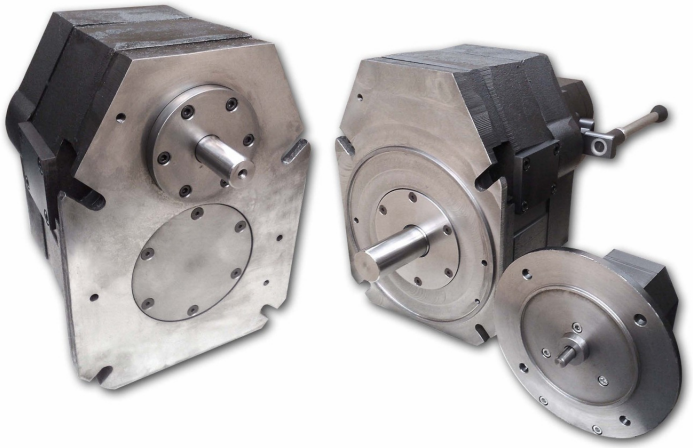

bruce@waterquestsolutions.com | +1 (604) 902-1902

Illustrations show representative products. Material grades, seals and pressure/temperature ratings are item-specific.

ARMAK MOTORS & DRIVE PACKAGES

# Put compressed air to work.

Pneumatic rotary power with controls and transmission options to suit the job.

## 1.8-16 kW (2.4-21.5 hp)

Geared piston motors for machinery, handling and process duties. Match starting torque, speed and available air to your driven equipment.

| Motor range | Power at 6 bar (87 psi) kW (hp) |
|---|---|
| AGP01 / AGP110E | 1.8 (2.4) |
| AGP04 / AGP210E | 3.5 (4.7) |
| AGP06 | 7.3 (9.8) |
| AGP07 / AGP310A | 8.0 (10.7) |
| AGP10 / AGP410A | 11 (14.8) |
| AGP16 / AGP510A | 16 (21.5) |

## Build the complete drive.

Lever or remote control • Power valves • Emergency stop • Silencers • Filter-regulator-lubricator • Parking brakes • Gearboxes and interfaces

Air motors require filtered, water-separated, regulated and lubricated air. Final duty, configuration and any hazardous-area documentation are confirmed for the application.

### Request an Armak motor or drive-package quote.

Send torque, speed, duty cycle, air supply and the controls you need.
